Non-overlapping 1000 RC instruction usage

Population Instruction Usage Report

Runs included: 179

Measurement: each genotype sequence in the largest detail-*.spop snapshot per run, weighted by the number of living organisms for that genotype, then normalized by total weighted instructions in that snapshot.

Setups:

- Non-overlapping 200: 20 runs, largest updates 0-0
- Non-overlapping 500: 19 runs, largest updates 0-697,505
- Non-overlapping 1000: 20 runs, largest updates 0-573,365
- Overlapping 200: 20 runs, largest updates 0-148,682
- Overlapping 500: 20 runs, largest updates 0-144,526
- Overlapping 1000: 20 runs, largest updates 0-157,679
- Non-overlapping 200 RC: 20 runs, largest updates 0-545,155
- Non-overlapping 500 RC: 20 runs, largest updates 0-413,637
- Non-overlapping 1000 RC: 20 runs, largest updates 0-506,861
